Fresh Easy Fresh® 2.0 Cover w/Batteries

Powerful enough to freshen even your largest spaces, Easy Fresh is the worlds only air freshener dispenser that uses the fragranced cover of the dispenser as the air freshener refill itself! Now you can save yourself time and energy with a product that makes replacement easy. The Easy Fresh fragranced cover is composed of a unique material containing 2-3 times more fragrance than gels or metered aerosols. The motor-driven fan moves fragrance further than a typical passive system, thus freshening larger areas. The smart system behind the Easy Fresh releases approximately the same amount of air freshener daily over 30 days by turning the fan sparingly in week 1, and gradually turning it more frequently until week 4 when the fan runs constantly. The smart dispenser comes with a light that alerts you to change your cover after 30 days, and begins counting down another 30 days once you change the cover!

Fresh Eco-Air® Passive Air Fresheners & Dispensers

The modern design is not only interesting but deliberate. The open-air structure creates maximum surface area exposure and space for air flow to provide effective and efficient fragrance release. Dry fragrance technology: Unlike aerosols, they don't contain any propellants or acetone so they are cleaner and there's no sticky residue. Eco-Air refill's are part of Fresh Product's closed-loop recycling program and are 100% recyclable. Freshens for 30 days. No mess dry fragrance. Eco-Air refills release just the right amount of fragrance while reducing fragrance overload.

Strong Man Coreless Roll Can Liners

Made with a combination of LLDPE and LD resins. LLDPE has a high tensile strength and high impact and puncture resistance. It is very flexible and will elongate under stress. This provides the extra strength, elasticity and performance at lower mil weights. LLDPE also has a good resistance to chemicals; they will perform well in temperature extremes and confine odors. LD is the most common plastic used to make can liners, as it is rather soft and flexible. By blending it with LLDPE, the strength increases without losing the thinner mil weights and flexibility. Has a star-seal bottom. Perforated coreless roll.
